FLEX-ABLE

U-FLEX

UNIVERSAL FLEX CONTROLLER

Powerful, full-featured control and monitoring
at an affordable price

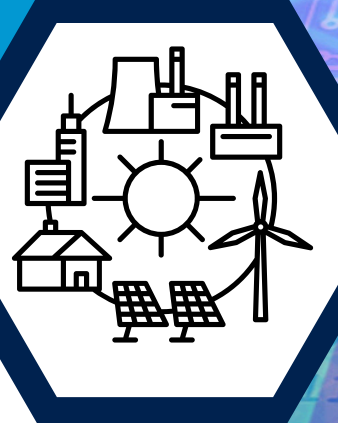

Overview:

The U-Flex Controller is a commercial-grade, behind-the-meter energy management device that helps businesses unlock savings from dynamic energy pricing and flexibility programs. With dual 16A switching and Current monitoring up to 1000A, it manages heavy loads while providing precise energy measurement at scale. By integrating with time-of-use schedules, dynamic price signals, and demand response programs, U-Flex enables businesses to reduce peak charges and shift consumption to lower-cost periods. Built for reliability, it combines robust load control, energy data, and seamless IoT/cloud integration to support the shift toward smarter, more flexible energy use.

Take the power back! Control your energy use

- ✓ Provides detailed energy reporting for smarter maintenance, reliability, and efficiency.
- ✓ Customisable relay configuration for universal, simple control integration with common commercial and industrial controls.
- ✓ The Flex portal web app provides simple scheduling along with specialised tools for flexibility and demand response.
